DETAILED ACTION

Claim Rejections - 35 USC § 112

1. In response to applicant's amendment of 6/5/2007, the examiner has removed all prior 35 USC § 112 rejections.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3,7-8,11-13,16,17,20-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Li. (6,149,669).

Li discloses in figures 8-10, a suture anchor having the limitations as recited in claim 23, including: an engaging portion 30 with a wall of a borehole 50, a shaft 42 extends from the engaging portion, where a suture retaining portion at 63 is able to retain the suture portions with a loop (see col. 7, lines 21-24), where a concentric member 46 disposes about a portion of the shaft, and where the application of a force which is able to move the shaft with respect to the concentric member that allows to clamp at least two suture portions in the suture retaining portion at 63 thereby to secure the suture forming the loop in the suture retaining portion and secure the second tissue to a suture anchor 20. As to claims 1-3,7-8,11-13,20-22, 24, Li

Art Unit: 3734

discloses in figures 8-10 a method of securing the tissues with an anchor using a system as described in claim 23 and further including a deformation at best seen in figure 9,10 where the step of actuation of the fingers 48, 49 would cause a deformation to engage a wall of the borehole thereby to secure the suture anchor 20.

Allowable Subject Matter

3. Claims 4,14-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Response to Arguments

4. Applicant's arguments 6/5/2007 have been considered but are moot in view of new ground(s) of rejections. Applicant is asked to please refer to the modified prior art rejections above where examiner addresses applicant's concerns regarding prior art rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 3734

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
